Java 8+ / Spring / RESTful web services / Scrum / DevOps / TDD / JUnit / HTML5 / CSS3 / Javascript / Git / Cloud Computing / Azure / AWS / IBM WebSphere / Kafka / Maven / Jenkins / Sonar / XLD/R / UCD / Hibernate / JSON / DBMS / SQL / Document Store / C#

Profile

Tiago is a Senior Software Engineer experienced in designing, developing and maintaining applications using different languages and technologies. He has contributed to the development of solutions in different sectors, such as, academic, industrial, retail and wholesale markets, public entities, and commercial banking. Tiago has deep practical experience with Java, Rest APIs, Cloud Computing, CI/CD tools, and relational databases, having worked on different projects and teams in agile development environments. He has also built solutions using HTML5/CSS3, Javascript, C# and NoSQL.

When coding, Tiago values the quality and readability of the code, and focuses on the best design practices, code documentation, test-driven development, and adherence to quality metrics to ensure the reliability of the services delivered.

Tiago has solid experience working with agile development teams in fast-paced environments. He is well-organized and objective in the execution of his tasks, and always seeks to promote a more productive and highly collaborative work environment. He believes that clear communication, focus on results and knowledge sharing are key to the success and maturity of a team, and uses these principles as the basis for his decision-making and way of working.

Work Experience

Senior IT Developer, ABN AMRO – Oct/2018 – Present – Amsterdam, Netherlands

- He works in the commercial banking department, developing APIs that connect to multiple internal and external services and allow customers to onboard themselves to partner SaaS solutions.
